Scope of Work — Extreme Staffing Website Redesign & Portal

---

1. Website Objectives

- Redesign the existing website (extremestaffing.com) with a **modern, professional, and mobile-friendly design**.
- Build an **integrated staff & client management portal** to reduce reliance on third-party tools (like Connecteam).
- Enhance **user experience (clients + staff + candidates)** with clear workflows.
- Strengthen **SEO & online visibility** to drive more organic traffic and conversions.
- Ensure **scalability** for future feature upgrades.

---

2. Homepage Structure

The homepage will serve as the primary entry point, combining branding, services, and calls-to-action.

Sections:

1. **Hero Banner** → High-quality visuals + headline ("Staffing Excellence for Every Event") + CTA buttons (Hire Staff / Join Our Team).
2. **About Extreme Staffing** → Short intro about company values & expertise.
3. **Services Overview** → Highlight types of staff available (servers, bartenders, chefs, attendants, etc.).
4. **Client Portal Access** → Quick login/register buttons for clients.
5. **Staff Portal Access** → Login/register buttons for staff & applicants.
6. **Why Choose Us** → Key differentiators (reliability, trained staff, customizable team sizes).
7. **Testimonials/Reviews** → Showcase client feedback.
8. **How It Works** → Simple 3-step process (Request → Confirm → Staff Assigned).
9. **Call-to-Action** → "Hire Staff Now" + "Join Our Team".
10. **Footer** → Contact info, social links, quick links, newsletter signup, SEO-optimized schema.

---

3. Pages & Features

A. Client-Facing Pages

1. **Hire Staff / Client Portal**
    - Staff ordering system (choose staff type: servers, bartenders, bussers, attendants, etc.).
    - Custom order form (event type, date, number of staff, roles needed).
    - Option to **rate staff after shifts** (punctuality, attire, attitude, etc.).
    - "Favorite Staff" feature for recurring bookings.
    - Payment gateway (Stripe/PayPal) for deposits/invoices.
2. **About Us**
    - Company background, mission, and values.
    - SEO-rich content for trust-building.
3. **Services**
    - Dedicated pages for each staff role (Servers, Bartenders, Bussers, etc.).
    - SEO optimized with keyword targeting (e.g., "Hire Event Bartenders in [City]").
4. **Testimonials/Case Studies**
    - Showcase client success stories.
    - SEO-optimized structured data (review schema).
5. **Contact Us**
    - Smart contact form (integrated with CRM/email).
    - Map integration (Google Maps).
    - Click-to-call & WhatsApp integration.

B. Staff-Facing Pages

1. **Careers / Join Our Team**
    - Job listings for open roles.
    - Online form to submit details.
    - Resume upload + basic data collection.
2. **Interview Booking**
    - Calendly integration for Zoom interviews.

3. **Skill & Personality Assessments**
    - Integration with test tools (custom quiz engine / third-party API).
4. **Staff Portal**
    - Staff login area.
    - Dashboard with assigned shifts, contracts, documents.
    - Secure contract storage (PDF view/download).
    - Timesheet submission + pay stub viewing.

C. SEO & Marketing Pages

1. **Blog**
    - Regular publishing of staffing tips, event management advice, hiring trends.
    - SEO-focused articles to target keywords.
2. **City/Service Landing Pages** (for SEO)
   Example:
    - "Hire Event Staff in New York"
    - "Bartender Staffing for Weddings"
    - "Corporate Event Staffing Solutions"

Each optimized with local SEO (title, meta, schema, FAQs).

---

4. Backend Functionality

1. **Admin Dashboard**
    - Manage clients, staff, and event bookings.
    - Approve/reject staff applications.
    - Assign staff to events.
    - Track ratings & reviews.
    - Generate reports (events booked, staff hours, client satisfaction).
2. **Client Management**
    - CRM-style system:
        - Track client profiles, event history, payments.
        - Auto-generate invoices.

        - View feedback & favorites.

3. **Staff Management**
    - Staff profiles with personal details, role, contract, availability.
    - Upload contracts securely (encrypted).
    - Manage timesheets & pay stubs.
4. **Payroll & Timesheets**
    - Auto calculation of hours worked.
    - **5-hour minimum pay rule** automation.
    - Ability to add **deductions** (worker's comp, uniforms) & **additions** (tips, drive time).
    - Export payroll reports (CSV/Excel).
5. **Notifications & Communication**
    - Email/SMS reminders (shift assignments, contract updates, payments).
    - Client notifications for booking confirmations.
    - Staff notifications for new shifts.
6. **Content Management System (CMS)**
    - Easy to update content (pages, blog, services).
    - SEO meta tags editable from backend.

---

5. Technical Features

- **Responsive Design** (Mobile, Tablet, Desktop).
- **High-Speed Performance** (optimized loading).
- **SEO Best Practices** (meta tags, schema, sitemaps).
- **Security** (SSL, encrypted staff contracts, GDPR compliance).
- **Scalability** (future modules can be added easily).

---

6. Improvements Over Current Site

- Current site is more **informational** only → new site will be **transactional + interactive**.
- **No portal system currently** → new build will integrate both **Client & Staff portals**.
- **No payroll/timesheet system** → new build adds **automated payroll with rules**.
- **Poor SEO reach** → new build includes **SEO landing pages + blog**.
